*Where the
Summer
Goes*
(chapters
on
youth)

It's summer, a boy and his friends go to the river. On the ride there, a story is told about a man and his pet snake that tried to eat him. The boy falls from a tree trunk and gets hurt. A girl follows him. A couple kiss each other, another boy explores the woods and a third one just lays by a tree eating a peach.

In four chapters, the heat and the humidity of the forest unravel desires among them.

*Where are you going?
said the girl.*

*I don't know...
said the boy.*

Where the Summer Goes (chapters on youth) is about the blooming of youth, the desire to discover oneself in the midst of the others, the power and magic of Nature and about those who wander.

For almost all the members of both the artistic and technical crew, this is their first film; an encounter between recently graduated film students looking forward to share their young vision and passion for film in a final piece of their own journey.
